DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of group I, embodiment 2 [figure 3], claims 14-20 in the reply filed on 04/25/2005 is acknowledged. The traversal is on the ground(s) that claims 21-26 should be examined together with claims 14-20 and claims 14-26 read on elected embodiment 2 [figure 3]. Examiner agrees to re-join group claims 21-26 with claims 14-20, however, claims 17-20 and 24-26 do not read on the elected embodiment 2 [figure 3]. Claims 14-16 and 21-23 will be examined herewith.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-16 and 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson [US 6,445,271].

Johnson discloses a micro-coils of an inductive component in planar substrates [figures 1A-2C] comprising:

- a substrate [11];
- a plurality of conductive lines [17], each of which extends along a bottom surface of a trench [19] in the substrate, along opposing sidewalls of the trench, and along an upper surface of the substrate at both sides of the trench;

Art Unit: 2832

- wide/conductive bonds interconnecting portions [16] connecting, with the plurality of conductive lines forming a plurality of windings for the inductive component; and
- a magnetic material in the trench as a core [20] for the inductive component [column 6, lines 61-64.]

Regarding claims 14-16, the claims method steps would necessitate by the apparatus.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
